SKILLS

GOOD COMMUNICATION SKILLS
I am good at both listening and speaking, sparking new ideas and giving value. Last summer break I got to join one of the meetings with Relab, listening to everyone's input and giving my own pitch.

PROGRAMMING SKILLS
I spend most of my free time reading up on technology news, learning more about Javascript, C, HTML, CSS, SQL, and other programming languages. I have been able to use these to my advantage in creating my portfolio website.

PROBLEM SOLVING
I am able to tackle the problem from multiple angles until I understand where, and how to solve it. I have been working on a property website where I have a section of the website that needs to be hidden until a radio input is selected. Using JQuery, I was able to solve this problem.

SELF-MOTIVATION
I am a highly motivated student, always looking to better myself. I wish to be either a software developer/engineer or full stack developer and will push myself to get there.
